

Majd Saati

Full-stack Developer

+963935387582 mhdmajdsaati@gmail.com Damascus, Syria

Profile

Full-stack Developer specializing in Node.js, React.js, Next.js, TypeScript, and MySQL, with experience designing and building scalable web applications from frontend interfaces to backend services. Proficient in REST API development, database design, authentication, role-based access control, reusable component architecture, performance optimization, and delivering reliable, maintainable solutions in collaborative Agile environments.

Education

Bachelor's Degree in Communications & Electronics Engineering 01/2013 – 01/2021
Damascus University

Work Experience

Full-stack Developer 12/2024 – Present
FlyCham Damascus

- Developed full-stack features for the Fly Cham website and booking platform using Node.js, MySQL, Next.js and React.js
- Built and maintained RESTful APIs, implementing business logic, authentication, validation, and integration with external services.
- Collaborated with 6+ developers on the website and admin dashboard, including ticket booking and ticket management functionalities
- Designed and optimized MySQL database schemas, queries, and API endpoints for reliable and scalable data access.
- Implemented scalable frontend architecture using Redux Toolkit and React Query, with multi-language and multi-POS support using 118next.
- Developed 20+ responsive pages and 30+ dynamic reusable components, focusing on performance and responsiveness

Frontend Developer 01/2024 – 11/2024
Peal link Damascus

- Led a frontend team of 3+ developers and improved code quality and performance.
- Developed reusable React components and integrated REST APIs.
- Built Menwer Dashboard [↗](#), a legal management platform with role-based access control using React.js, Redux Toolkit, and MUI.
- Contributed to Miamed Dashboard [↗](#), a healthcare platform for managing medical services and workflows.

Freelance Web Developer

- Isuzu Admin Dashboard [↗](#)
- Developed an admin dashboard for managing dealer plans, activities, operational costs, statistics, reports, and role-based access, integrating REST APIs with reusable components.
